

Sustainable packaging

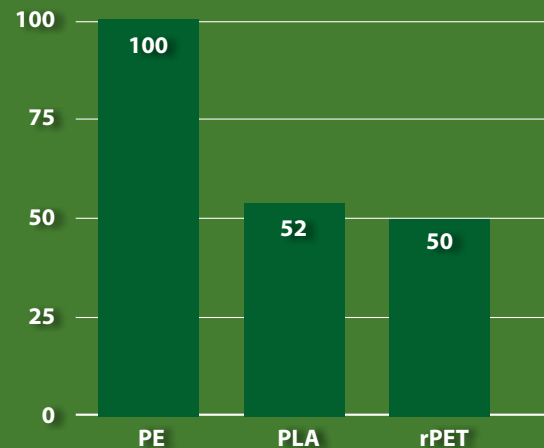

Sustainability effect for the use of deli/salad bowls made of recycled PET (rPET) or bio plastics (PLA) in comparison to standard PE (polyethylene) bowls with a consumption of 400 packaging per day.

CO₂ kg emission
per year

400PE packaging per day = 7.2t CO₂ per year
PLA packaging -62%, rPET packaging -85%

Production's energy
consumption per kg
in comparison in %

50% less energy consumption in PLA/rPET
packaging production in comparison to PE
