

# from recycled PET bottles

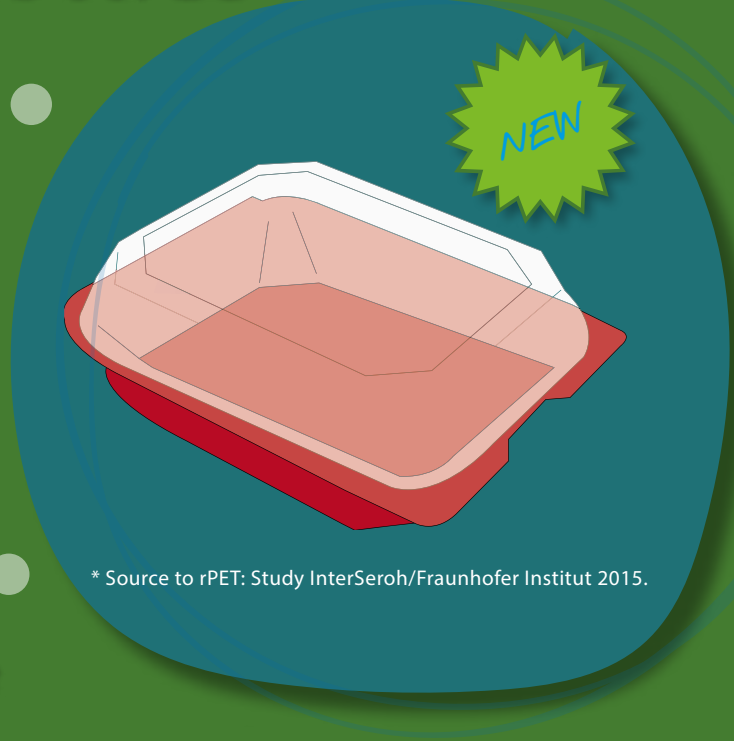

100% recyclable PET

100% recyclable for several times

Up to 85% less CO<sub>2</sub> emission in comparison to non-recycled material\*

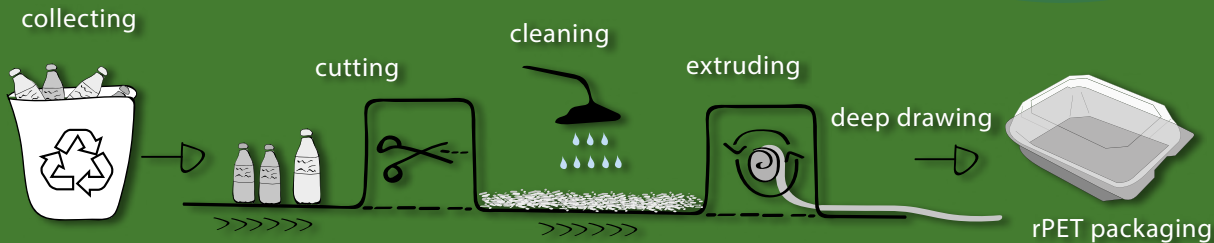

50% less energy consumption in production

Available in different versions

\* Source to rPET: Study InterSeroh/Fraunhofer Institut 2015.

## How it works:

After sorting the collected PET bottles, they are reduced into small pieces, cleaned and then compressed into big rolls of recycled PET. These rPET rolls are subsequently used to produce sustainable bottleBOX© food-service packaging.
