Colour space CMYK	Resolution 300 dpi	Convert text to paths	Data format	Safe zone	File type

- Your file should be created in CMYK with the color profile ISO Coated V2

- Special colors are converted automatically

- Create images with a resolution of 300 dpi

- Let images or background colors run to the edge of the data format

- Convert text into paths

- Let images or background colors run to the edge of the data format

- Place text or important elements within the safe zone

- Save file as PDF

- Note that for production-related reasons, at least 1 mm corner radius is cut off from the final format. Keep this in mind when creating the layout

- Remove the "Template" layer from the print file

- Please make sure that the "Cut line" layer MUST remain in the print file. If this is missing, additional costs can arise

———— Data format
———— Final format / Cut line
- - - - Safe zone

Attention! Please remove the layer „Template". DO NOT remove the layer „Cut line".
